# **PAINS BAY FIRE**

NC-ALR-111006 PRF3FT (1502)

# Incident Action Plan Wednesday June 29, 2011 0700-1900 hrs

# INCIDENT OBJECTIVES

1. INCIDENT NAME

PAINS BAY FIRE

2. DATE PREPARED **6/28/2011**  3. TIME PREPARED 1830

4. OPERATIONAL PERIOD (DATE/TIME)

Wednesday, June 29, 2011 0700 to 1900 hrs

5. GENERAL CONTROL OBJECTIVES FOR THE INCIDENT (INCLUDE ALTERNATIVES)

### **Control Objectives**

- 1. Providing for the safety, health, and welfare of firefighters and general public is our highest priority:
  - Adhere to the 10 Standard Fire Orders
  - Mitigate the 18 Watch-Out Situations
  - Implement and maintain LCES
  - Conduct frequent Risk Mamt. Assessments
- 2. Coordinate with Dare Emergency Management Coordinator if fire threatens Stumpy Point village and evacuations appear necessary.
- 3. Continue to provide LE presence at designated location on US 264 to implement immediate road closure if needed for escape fire and dense smoke/fog conditions.
- 4. Keep fire contained west of US 264, south of US 64 and east of the Milltail Rd / Alligator Rd / Poplar Ridge Rd corridor.
- 5. Provide for initial attack support in areas as designated in the Delegation of Authority.
- 6. Continue to implement written Water Handling Plan. Begin evaluating pumping needs as Water Handling Operations moves from increasing water levels to maintaining water levels to the maximum capacity of the canal/ditch system.
- 7. Ensure that suppression & containment strategies on FWS property follow minimum impact suppression tactics. Any escalation in tactics should consider progress made with current tactics and the likelihood of those tactics being successful.
- 8. Provide for the protection of infrastructure devices, experimental tree plantations, and soil and water monitoring stations throughout USFWS property and infrastructure, structures, targets, laser city, cameras, etc within Dept. of Defense (DOD) land
- 9. Coordinate the identification of potential suppression rehabilitation needs for both USFWS and DOD lands.

# **Management Objectives**

- Keep general public & local officials in affected counties and incident stakeholders informed of fire status through situational updates and personal contacts.
- 2. Provide for accurate cost tracking and documentation to meet the needs of USFWS and DOD. Ensure financial management conducted per Interagency Incident Business Handbook procedures.
- 3. Emphasize cost containment through continual assessment of personnel and resource needs and the "right sizing" of incident staffing.
- 4. Work to allow military flight operation to as near normal operations, even if for limited time each day when it can be done safely, within FAA regulations and without hindering suppression operations on DOD or USFWS lands.

# Fire Behavior Forecast - Pains Bay

Time and Date Forecast Issued: 1700hrs Tuesday 6/28/11

For: Wednesday 6/29/2011

Forecast Number 49 Lloyd Brown FBAN

Weather Summary: A weak cold front will become stationary along the south coast today and Thursday.

Today will be mostly cloudy with a chance of showers and thunderstorms, High Temp 85 degrees, Min RH 64%. Winds W 8 mph with gusts to 20 mph until noon, then becoming light and variable. Expect gusty and erratic winds near thunderstorms. Haines Index 4....Mixing Height max 4400 feet... Transport Winds W 15 becoming SW 4.

Time	0800	1200	1400	1600
Temp	79	84	84	84
RH	80	69	67	65
Wind	SW10G20	W6G10	NW4G5	N3G5

Local Thresholds – Watch Out (Fire Danger Pocket Card) Wind Speed > 15mph RH < 25% Temp >90

# **General Fire Behavior**

.01(south) to .25 (north) inch of rain fell Monday night 6/27. The rain will diminish the fire activity on the north end for several days but the remaining interior heat will continue to show itself. Smoldering and active flame ground fire has been observed along with active fire creeping in the litter and flare-ups with torching that die back down. The fire has burned actively in green and cured fuels. Torching has been observed with some spotting. Watch for needle/leaf cast on all divisions which will provide surface fuels for smoldering or active ground fire.

### **Specific Fire Behavior**

# If we received a significant amount of rain last night then the fire will be quiet today.

<u>Alpha, Bravo, Foxtrot</u> – Organic soils will continue to dry and some of the remaining ground fire should heat up and begin to smolder or show open flame during the mid to late afternoon. Some interior reburn and torching is possible in unburned cured fuels and in any remaining green pockets of fuel.

<u>Echo</u> - Organic soils will continue to dry and some of the remaining ground fire should heat up and begin to smolder or show open flame during the mid to late afternoon. Interior reburn and torching is possible in unburned fuels.

<u>Charlie, Mike, November</u> - Organic soils will continue to dry and some of the remaining ground fire should heat up and begin to smolder or show open flame during the mid to late afternoon. Reburn and torching is possible in unburned fuels.

<u>Kilo, Lima, Oscar</u> – Organic soils will continue to dry and some remaining ground fire should heat up and begin to smolder or show open flame during the mid to late afternoon. Reburn and torching is possible in unburned fuels.

Fuel Model	ROS Chains/Hr	Flame Length	Spot Distance Feet	PIG
Sh9 very high load humid climate shrub	4-8	4-6	500	27%

Dare Bomb Range Predicted NFDRS Indices for Today for Fuel Model G

1 hour fuel moisture	10 hour fuel moisture	100 hour fuel moisture	1000 fuel moisture	ВІ	IC	ERC	KBDI
11%	14%	17%	18%	0	0	24	607

**Controllability-** Indirect attack should be used if fires become established. Aircraft should always be utilized in the containment effort.

# **Hazards:**

<u>Air Force Bombing Range-</u> Make sure you have the Air Force Bombing Range procedures and understand them. If you don't have a mission in this area stay away, give the military their space.

<u>HYDRATION/HEAT STRESS</u>- Drink often and drink a lot, 4:1 water to sports drinks. Take frequent breaks to cool down.

<u>Pumps</u>- Stay away from volume pumps. PTOs and exposed drive belts can kill you. Noise levels can be high, wear hearing protection. Shut down pumps to service. <u>DON'T STAND BEHIND A TRACTOR, IT IS POSSIBLE IT COULD ROLL BACK OR THE GROUND IT SITS ON COULD COLLAPSE.</u>

# **TRANSITION**

- 1. Has the safety and welfare of all incident personnel been addressed, and mitigation identified and completed?
- 2. Has the planned strategy for the incident been assessed and monitored to determine effectiveness?
- 3. Are supervisors and overhead maintaining command and control of the Incident?
- 4. Do all resources know the name of their immediate supervisor, and can that person be contacted when needed?
- 5. Are all personnel complying with the work rest guidelines?
- 6. Are personnel on the Incident only assigned to positions, for which they are fully qualified, unless they are assigned to training or qualifying assignments with a fully qualified mentor/coach?
- 7. Did all incoming resources receive an adequate briefing?
- 8. Have all critical Team positions been identified and filled?

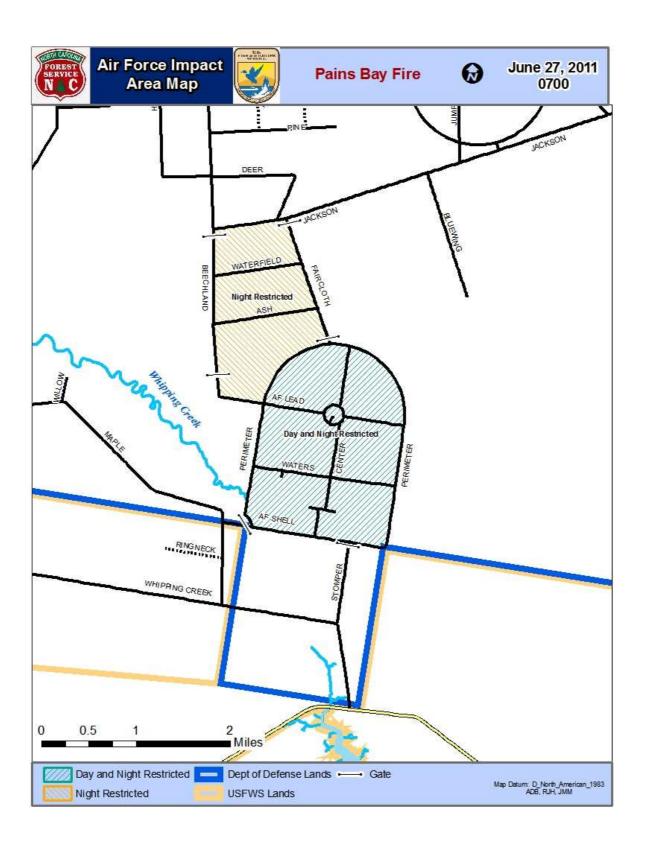

Safety Officers: Mike Kretzschmar, Mike Huffman

# Air Force Bombing Range Procedures

Starting June 27, 2011 (from 0800-2000 hrs everyday) the Air Force will resume active training runs using various weapon systems (including bomb and strafing runs) from aircraft on the Dare County Bombing Range

No one is to enter Division "E" without specific approval of Division Supervisor "Echo" every time entering this Division.
DIVS "E" will acknowledge all personnel AND equipment entering and exiting the bombing range for full accountability at all times.
Division Supervisor "Echo" is the tactical Point of Contact with Air Force Tower and all Pains Bay Fire firefighters for this activity for dayshift operations (0700-1900 hrs).
All personnel are to monitor the assigned fire frequency at all times for priority traffic from DIVS "E".
Upon notification of an impending active Air Force training mission (with bombs or strafing), all fire personnel shall cease their work and exit the immediate bombing range as directed.
COMMUNITATION TO THE VEVIL 1 C E C

COMMUNICATION IS THE KEY!! L  $\underline{c}$  E S
